Roll-A-Pro™

ROLLING DOOR OPENER

Optional Accessories

Entry Keypad

Allows entry to the garage without a remote transmitter. Great for children. No need to give them a key or transmitter as they can enter the house with their PIN.

Wireless Safety Beams

If you have young children or pets, safety beams provide added safety and security. If the beam is broken while the door is closing, it will automatically stop and reverse. B&D always recommend the use of safety infra-red beams on all automatic garage doors.

Rechargeable Battery Back Up

If power supply to the opener is broken, the door will still be operational with the rechargeable battery back up.
